

Guest Wireless Internet Access

1. Open your Wi-Fi menu and select 4jwireless. On a Mac this is at the top right corner of the screen near the clock and battery status:

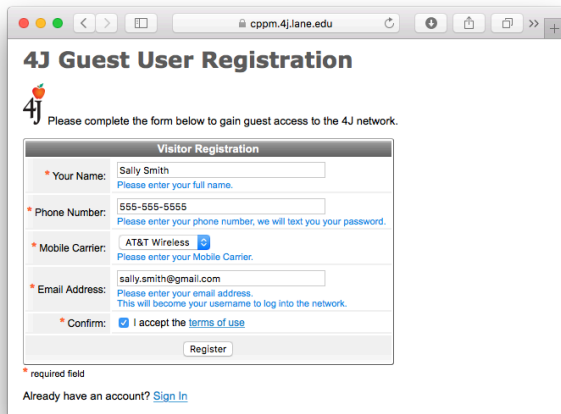

On Windows it's at the bottom right, in your taskbar:

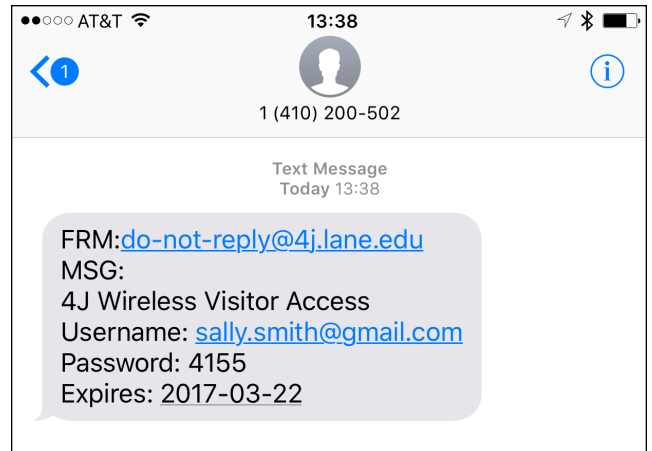

2. A login window may automatically appear. If it doesn't, open a web browser and try to visit a non-4J website such as <http://www.cnn.com>
3. When the login screen appears, click the link labeled **Guests: Register for a temporary Day Pass account.**

4. Fill out the **4J Guest User Registration** form. If you are carrying a cell phone please enter that number rather than a landline at your home or office.

6. You will soon receive a text message containing a verification code. **If you can't receive text messages:** The password has also been emailed to the address you used to register. If you don't have a cell phone or the message does not arrive, you may ask a 4J staff member to let you check your email on their computer to retrieve the code.

7. If you still have the registration window open, click the link labeled **Login here: 4J Network Login.** If not, open a web browser and try to visit a non-4J website such as <http://www.cnn.com>

8. Log in using your email address as the username. The four-digit PIN you received is the password.
9. Your will expire after 24 hours. If you need extended access this time can be extended. Please have a 4J staff member request extended access by writing to nethelp@4j.lane.edu In their message they should specify:
 - Which email address you used to register.
 - How long your guest account needs to remain active.

5. Click the **Register** button.
