

Attention Students!

Are you feeling socially isolated? Are you looking for a club opportunity during this time of distance learning? Are you interested in health and emotional wellness?

Your Churchill School-Based Health Center is hosting a Youth Action Council (YAC) this school year and invites students to participate. It is supported by a state grant, including stipend money for students. The goal is to enhance youth engagement in health promotion at Churchill.

You'll have the opportunity to connect with other students, learn some coping skills, participate in a youth-driven project that impacts population health at Churchill and removes barriers for students accessing health care.

Come have your voice heard, not just by Churchill but with the future opportunity to participate in a virtual State School Health Advocacy Day where students will be able to interact with state legislators in Salem. And it'll look great on a college application.

If you're interested, contact Claire Bierman at the Health Center by calling 541-790-5227 or emailing bierman_c@4j.lane.edu. Meetings will start out as virtual.
